Everest Group Services PEAK Matrix™ for Healthcare Payer BPO Service Providers

Focus on Cognizant
December 2017
Introduction and scope

Everest Group recently released its report titled “Healthcare Payer BPO – Service Provider Landscape with Services PEAK Matrix™ Assessment 2018”. This report analyzes the changing dynamics of the healthcare payer BPO landscape and assesses service providers across several key dimensions.

As a part of this report, Everest Group updated its classification of 25 service providers on the Everest Group Services PEAK Matrix for healthcare payer BPO into Leaders, Major Contenders, and Aspirants. The PEAK Matrix is a framework that provides an objective, data-driven, and comparative assessment of healthcare payer BPO service providers based on their absolute market success and delivery capability.

Based on the analysis, Cognizant cemented its position as a Leader and Star Performer. This document focuses on Cognizant’s healthcare payer BPO experience and capabilities. It includes:

- Cognizant’s position on the Everest Group healthcare payer BPO PEAK Matrix
- Detailed healthcare payer BPO profile of Cognizant

Buyers can use the PEAK Matrix to identify and evaluate different service providers. It helps them understand the service providers’ relative strengths and gaps. However, it is also important to note that while the PEAK Matrix is a useful starting point, the results from the assessment may not be directly prescriptive for each buyer. Buyers will have to consider their unique situation and requirements, and match them against service provider capability for an ideal fit.
Everest Group’s definition of HLS includes the following three segments

- **Healthcare and Life Sciences (HLS)**
  - **Payer**
    - Private health plans
    - Public health plans
  - **Provider**
    - Large health systems
    - Stand-alone hospitals
    - Pharmacists
    - Physician practices
    - Diagnostics labs
  - **Life Sciences**
    - Pharmaceuticals
    - Medical devices
    - Biotechnology
    - Others

**Notes**
- There are multiple operating-model alternatives ranging from internal shared services / Global In-house Centers (GICs) to third-party outsourcing. This package focuses primarily on third-party models.
- This package covers vertical-specific BPO within the Healthcare Payer space. It does not include coverage of horizontal business processes such as F&A, HR, procurement, and contact centers.

---

1 includes companies such as healthcare data & information services and medical products distribution
1. Service providers scored using Everest Group’s proprietary scoring methodology given on pages 15 and 16.

Note: Assessment for Technosoft and Visionary RCM excludes service provider inputs on this particular study, and is based on Everest Group’s estimates, which leverage Everest Group’s proprietary Transaction Intelligence (TI) database, ongoing coverage, service provider public disclosures, and interaction with buyers.

Source: Everest Group (2017)
Strong performance in last year helped Cognizant cement its position as a leader and star performer in the payer BPO space.

Change in Cognizant’s positioning on the Everest Group Services PEAK Matrix for healthcare payer BPO

- Backed by the acquisition of TMG Health, Cognizant gained significant client access, as the total number of clients increased by almost 50% for Cognizant in 2017 when compared to previous year.
- Meanwhile, revenue also witnessed significant growth during the same period and contributed significantly to the overall market growth.
- Improved performance in relationship management and use of tools & technologies helped enhance its overall buyer satisfaction score.

Capability enhancements in 2017
- Access to TMG’s augmentation offerings helped enhance its technology and innovation-related capabilities, which are primarily built on the leading claims administrative platform, Facets, also owned by Cognizant.
- Cognizant also gained access to significant onshore capabilities as TMG Health was predominantly an onshore-heavy service provider, while Cognizant relied heavily on its offshore delivery locations.
- TMG Health’s acquisition also helped cement its position in the privately-run government healthcare (MA and MCO) space.

**Cognizant** (page 1 of 8)

Healthcare payer BPO – Everest Group assessment

---

**Strengths**

- Possessing the leading claims and core administration platform (from Trizetto acquisition) provides them with the opportunity to offer true end-to-end BPaaS to its buyers.
- Its recent acquisition of TMG Health augments its presence in the privately-run government business of MA and MCO.
- It has constantly been investing to build a suite of solutions for payers, which is evident from the fact that they own one of the largest library of tools and solutions in the marketplace.
- For RPA implementation, the service provider employs a hybrid approach (in-house and third-party vendors) and has rich healthcare-specific use cases.
- Buyers appreciated its client-centric approach, wherein it aligns its vision and goals with that of buyer’s and is even willing to partner with other service providers to achieve these goals.

**Areas of improvement**

- Care management is one area where it should develop referenceable use cases, which will require significant augmentation. This would help it win more care-driven deals.
- Analytics is a weak link in its digital armor and, going forward, it should invest in building analytics capabilities that can be used along with its other solutions and tools as a pitch to win more business.
- It is the only large-sized IT+BPO player (with significant presence in the healthcare space) to not enter the state Medicaid space. In doing so, it is missing out on large market potential.
- Achieving the balance between reaping RPA benefits and not disrupting the system can be a bit tricky; however, it gains from being aggressive, which was highlighted by a few buyers as well.

---

1 Value delivered score and overall PEAK matrix positioning adversely impacted for those service providers who did not provide adequate information.
**Company profile:** Cognizant provides information technology, consulting, and business process outsourcing services. The company operates its business through four major segments – financial services, healthcare, manufacturing, retail and logistics, and others. The healthcare segment provides healthcare technologies and business services to support multiple client segments such as commercial, individual, HIX, Medicare, Medicaid, dental, vision, behavioral, and ACOs. In addition to providing BPS and BPaaS services it also serves Born Digital Health Plans.

**Key leaders**
- Francisco D’Souza, Chief Executive Officer
- Karen McLoughlin, Chief Financial Officer
- Rajeev Mehta, President
- Brent Barber, Vice President, Healthcare BPS & Market Lead
- Prabhakar Bisen, Vice President, Healthcare BPS & Delivery Lead

**Headquarters:** Teaneck, New Jersey, United States

**Website:** [www.cognizant.com](http://www.cognizant.com)

**Suite of services**
- Claims management
- Care management
- Product development
- Network management
- Member engagement
- Risk & compliance

**Recent developments**
- **2017:** Launched Cloud capabilities, Internet of Things, TruProvider, design thinking, and BigDecisions
- **2016:** Launched BPaaS model (for end-to-end payer services, supported by Trizetto technology, driving growth and interest in market), Healthcare Process Automation (HPA), HealthActivate, DBO, and SightPrism
- **2015:** Launched Decision Optimizer, Facets, QNXT, and QicLink
- Opened dedicated CoE for Intelligent Process Automaton (IPA) to explore new market trends, and assist global teams with training and best practices

Appendix
Everest Group PEAK Matrix™ is a proprietary framework for assessment of market impact and vision & capability.

**Everest Group PEAK Matrix**

- **Market impact**: Measures impact created in the market.
- **Vision & capability**: Measures ability to deliver services successfully.

- **Leaders**: High vision & capability, high market impact.
- **Major Contenders**: High vision & capability, low market impact.
- **Aspirants**: Low vision & capability, low market impact.
Services PEAK Matrix™ evaluation dimensions

Measures impact created in the market – captured through three subdimensions

- **Market adoption**
  - No. of clients, revenue base, and YOY growth, deal value/volume

- **Portfolio mix**
  - Diversity of client/revenue base across industries, geos, enterprise size class

- **Value delivered**
  - Value delivered to the client based on customer feedback and other measures

Market Impact

**Leaders**

**Major Contenders**

**Aspirants**

**Vision & capability**

Measures ability to deliver services successfully. This is captured through four subdimensions

- **Vision and strategy**
  - Vision for the client and itself; future roadmap and strategy

- **Scope of services offered**
  - Depth and breadth of services portfolio across service subsegments / processes

- **Innovation and investments**
  - Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.

- **Delivery footprint**
  - Delivery footprint and global sourcing mix
Everest Group confers the Star Performers title on providers that demonstrate the most improvement over time on the PEAK Matrix™

**Methodology**

Everest Group selects Star Performers based on the relative YOY improvement on the PEAK Matrix. In order to assess advances on market impact, we evaluate each service provider’s performance across a number of parameters including:

- Yearly ACV/YOY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

In order to assess advances on vision and capability, we evaluate each service provider’s performance across a number of parameters including:

- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the service providers whose improvement ranks in the top quartile and award the Star Performer rating to those service providers with:

- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

The Star Performers title relates to YOY performance for a given service provider and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
FAQs (page 1 of 2)

Does the PEAK Matrix assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment adopts an objective and fact-based approach (leveraging service provider RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information). In addition, these results are validated / fine-tuned based on our market experience, buyer interaction, and provider briefings.

Is being a “Major Contender” or “Aspirant” on the PEAK Matrix, an unfavorable outcome?
No. PEAK Matrix highlights and positions only the best-in-class service providers in a particular functional/vertical services area. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of PEAK Matrix assessment are relevant to buyers and providers besides the “PEAK Matrix position”?
PEAK Matrix position is only one aspect of Everest Group’s overall assessment. In addition to assigning a “Leader”, “Major Contender” or “Aspirant” title, Everest Group highlights the distinctive capabilities and unique attributes of all the PEAK Matrix providers assessed in its report. The detailed metric level assessment and associated commentary is helpful for buyers in selecting particular providers for their specific requirements. It also helps providers showcase their strengths in specific areas.

Does PEAK Matrix assessment incorporate “customer satisfaction” as an evaluation criteria/metric?
Everest Group does not have “customer satisfaction” as a separate metric in its PEAK evaluation framework. This is primarily because it is challenging to obtain interviews with a meaningful number of reference buyers for each service provider. Also, “customer satisfaction” is a highly subjective and opinion driven metric and there is no foolproof methodology to normalize this input. That said, we validate our PEAK results through buyer interaction and capture some consistent “spikes” or “lags” in performance through metrics such as “renewal rate”, etc.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Participation incentives for buyers include a summary of key findings from the PEAK Matrix assessment.
- Participation incentives for providers include adequate representation and recognition of their capabilities/success in the market place, and a copy of their own “profile” that is published by Everest Group as part of the “compendium of PEAK Matrix providers” profiles.
What is the process for a service provider to leverage their PEAK Matrix positioning, or “Star Performer” status?

- Providers can use their PEAK positioning or “star performer” rating in multiple ways including:
  - Issue a press release declaring their positioning/rating
  - Customized PEAK profile for circulation (with clients, prospects, etc.)
  - Quotes from Everest Group analysts could be disseminated to the media
  - Leverage PEAK branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with the designated POC at Everest Group

Does the PEAK Matrix evaluation criteria change over a period of time?

PEAK Matrix assessments are designed to serve present and future needs of the enterprises. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality as well as serve the future expectations of enterprises
About Everest Group

Everest Group is a consulting and research firm focused on strategic IT, business services, and sourcing. We are trusted advisors to senior executives of leading enterprises, providers, and investors. Our firm helps clients improve operational and financial performance through a hands-on process that supports them in making well-informed decisions that deliver high-impact results and achieve sustained value. Our insight and guidance empower clients to improve organizational efficiency, effectiveness, agility, and responsiveness. What sets Everest Group apart is the integration of deep sourcing knowledge, problem-solving skills and original research. Details and in-depth content are available at www.everestgrp.com.
